

**E-Drug Plus**

SINCE 1995

## E-Drug Plus Quick Start Guide

Please allow us this opportunity to share information with you that can assist in re-engaging the E-Drug community on the new platform.

We have focus on you being able to participate the same way you did on the previous platform. That means receiving emails from the group and being able to respond via email too.

In addition to that you will also be able to log in and enjoy many other features that the platform provides for a more interactive experience.

To get started please follow this link to the Registration page and click on forgot password and input the email address that you used for receiving E-Drug / E-Med / E-Lek emails until December 2022.

After the password reset you can login and should be receiving the regular digests as usual.

<https://talk.edrugplus.org/login>

We will be posting additional Tips & Tricks regarding the possibilities on the new platform as we continue the roll out.

Any technical challenges can be reported on [contact@e-drug.org](mailto:contact@e-drug.org)

Please expect a little time for us to review challenges reported as we engage on the new platform.

See you there!

*The Board of E-Drug Foundation*
